Re: Fire Extinguisher Maintenance – Addendum No. 1
Bid Reference: 2021-30

Date: 3 November 2021

Questions and Answers from Bidders, so far:

1. Question: There are significant price differences in the internal inspection and hydrostatic testing of different sizes of fire extinguishers, should that be addressed in bid?
Answer: the bid table has been changed so that pricing can be listed for each type.
2. Question: Will the only criteria for the bid evaluation be the cost of visual inspection?
Answer: The cost of service should also be considered. Since we can only estimate how many may need further consideration, I have established a separate table with estimated quantities for the evaluation.

A new bid form (page 11a & 11b) is attached and must replace the initial bid form (page 11). Bids should be submitted on the new bid form. The bid opening date/time remains the same.
